About Dr. K

My full name is Dr. Katherine E. A, Korkidis. Over my many years in teaching my students they come to affectionately call me Dr. K.

I began to work in Industry upon completion of my graduate degree in physics and chemistry. I was paid to do my own original research.

As part of my position I taught at many universities and developed new technologies while having the opportunity to travel throughout the US/Canada, Europe, Russia, and the Far East.

It was a wonderful experience, and I could teach and write at every turn.

Eventually I realized how much I enjoyed teaching and writing and returned to my passion.

Today I am a writer of historical fiction, contemporary fiction, and contemporary sweet romance as my genres of choice. *Josette* is my first novel.

My Books

Daniel

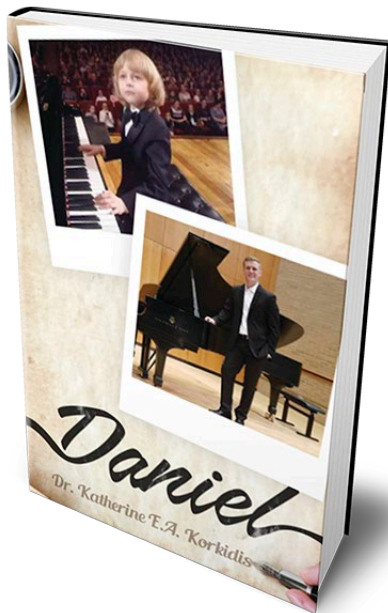

The story of Daniel begins with his birth and early life.

Daniel's early years with Jonathan and Katherine Ellington were wonderful and loving years.

His parents supported his love for music and encouraged his desire to play the piano.

He soon became a virtuoso at the age of 7 years old.

He was welcome to the international stage and his talents were renowned.

Having read *Josette* I felt I must read *Daniel*. *Daniel* is the sequel to a very different type of reading books are well written and quite intriguing however, I was connected to *Josette* as a woman, and he experienced some of her feelings, and my connection to *Daniel* during the read, I had felt much more turmoil. Once you read both you can decide for yourself. I am an empath and when I read or watch am right in the feelings and emotions of the characters. *Daniel* had so much to offer in the way of talents and charitable ways, and yet life affected him in such a way, he had to take the long, bumpy road to truly find himself. Both stories, *Josette* and *Daniel* are stories of real-life issues we all have or will experience over time. Both stories will resonate on some level when you read either or both. What I want to see through the lens of the writer, how she looks at both of these characters from within each character and from an outside point of view. *Daniel* pulls the story of *Josette* into it closer to the end as I'm sure the 3rd sequel will follow. It must. And I am going to be looking forward to it so I can see how the gifts and heartache these two have as individuals may come together and shine more brightly for those in their

Josette

The story begins with Josette at the age of 25 years old.

She has just returned to her childhood home from a successful classical piano world tour.

It is snowing outside.

As she glances at the snow through the window of her childhood bedroom, she reflects upon her past.

She begins with the events of her 8th and 9th birthday – a turning point in her life.

As Josette remembers all, she hears a voice and realizes it is Daniel, the man she loves, calling her.

The urgency in his voice compels her to find him.

Reader

"I think anyone who reads this book can find a piece of them somewhere within the story line. Even if you don't see it right away you will find it by the ending. At the very least we all need to rely on hope at some point in our lives and you will certainly find that here."

Reader

"It has turned very cold as winter is setting in!
BUT....I spent the last few days inside with "Josette"!!
She is such wonderful thoughtful, insightful and loving company!!!
I was walking with her on her journey to make sense of life (happiness and sorrow)
and how these life events affect people and can determine their actions and hearts.

She is a lot more musically talented than I am, but she let me come along and share a part of her life!!! Thank you Josette!"

AJK Anthology

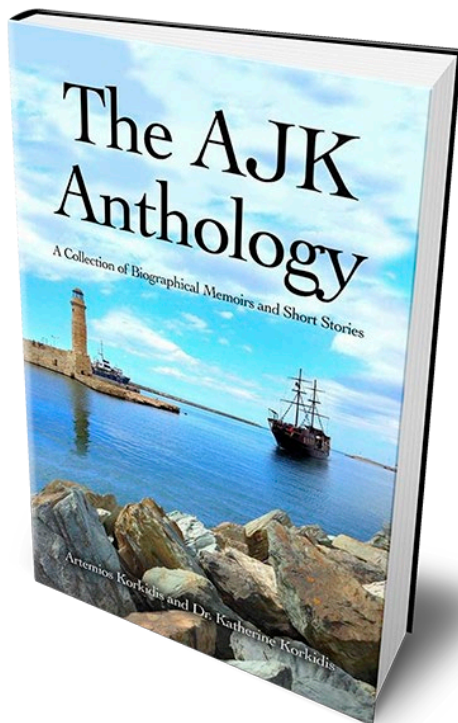

The AJK Anthology is translated from my father's original works and with the addition of new content it is now published. eBook and Print copies will be available early April of 2022.

It is a work of historical fiction interlaced with his memoirs.

During the Nazi occupation of the island of Crete in 1941, there lived a young man, Artemios John Korkidis.

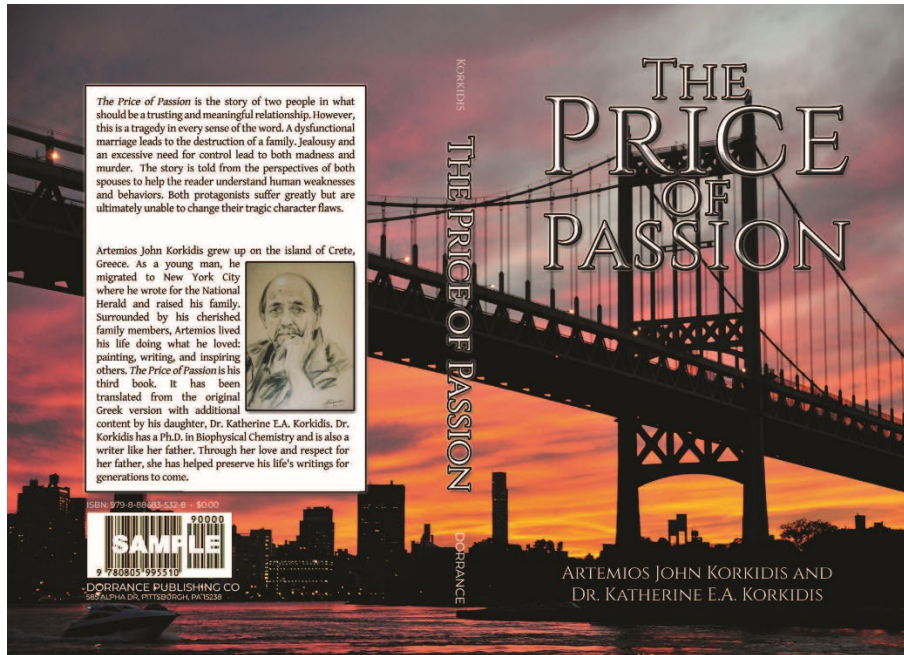

In a series of biographical memoirs, short stories, and a lifelong collection of personal reflections,

be transported through the horrors and hardships of war as one man learns that there is always hope in the future.

Coming in December 2022

The Price of Passion

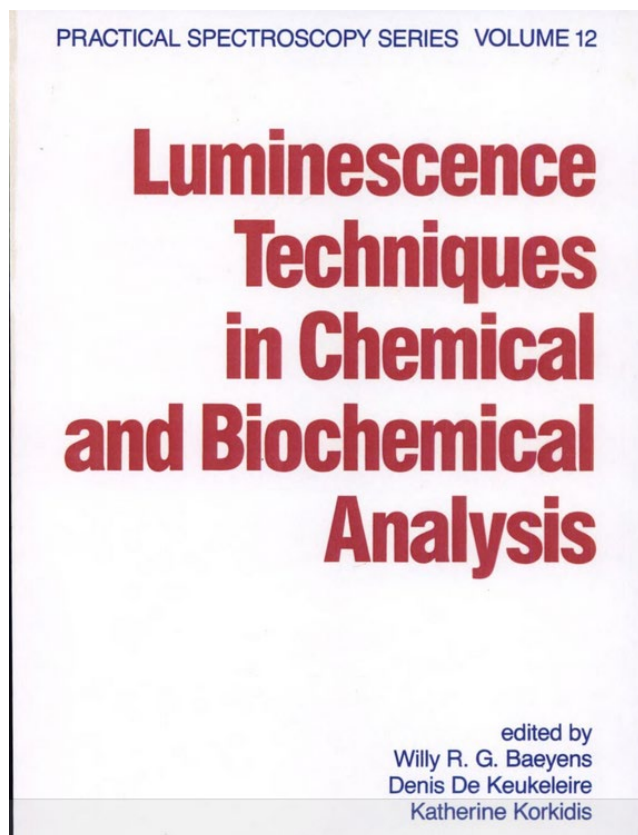

Books Coming by mid- 2023

Josette and Daniel – The third book of the Josette, Daniel, Trilogy in eBook, Hardcover and Audio.

KEAK Anthology – A compilation of Dr. K's written fiction in the form of short stories and essays.

The Ardent Traveler – Dr. K's Travel Memoirs of US, Canada, Europe, and Asia.

Nonfiction Science Book from the Past

Provides information on modern luminescence techniques, beginning with a general introduction to luminescence spectroscopy. Divided into two basic sections, the first dealing with fluorescence and the latter part on chemiluminescence. Topics include immunoassays, the use of chemiluminescence in flow cytometry. . The strength of the book is in relation to the applications of fluorometric techniques in analytical chemistry rather than clinically related analysis in complex biological systems. The theory and applications of some of the more specialized methods such as frequency domain fluorescence spectroscopy are very professionally presented.

Book Reviews

Luminescence Techniques in Chemical and Bio-chemical Analysis. Ed by W R G Baeyens, D De Keukerleire and K Korkidis. New York: Marcel Dekker Inc., 1991. Pp 680.

" . . .brings to light several novel methods of luminescence analysis and will be of practical use to readers working in the field, as well as being of general interest to a wider analytical audience. "

---Analytica Chimica Acta, 1992

" . . .covers a wealth of techniques and should be on the bookshelf of the life scientist interested in analysis. "

---Trends in Analytical Chemistry, 1992

From - Ann Clin Biochem 1992; 29: 474-475

“This is a useful book in that it emphasizes just how much progress there has been in the last 10 years in relation to analytical procedures which employ luminescence endpoints. Given the rate of progress, there will certainly be future volumes on this important field.” J S WOODHEAD
